In case the portfolio of the Scheme is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in para 2.9 of SEBI Master Circular on Mutual Funds dated May 19, 2023.</p>			
Investment Strategy	<p>Scheme seeks to generate income by predominantly investing in equity and equity linked instruments.</p> <p>Scheme aims to identify the price differentials prevailing for a stock / index in 2 market segments (cash, futures, etc.). Trades are executed once the price differentials are identified. Generally, trades will be executed provided that they generate returns higher</p>		

	<p>than short term debt instruments (call money, money market instruments, liquid schemes, etc.) net of expenses.</p> <p>Scheme will buy a stock where it is available cheap and sell the stock where it is quoting at a higher price. Simultaneous buy and sell trade will be entered into in both the market segments (Cash & Futures). Gains that the trade would offer, is identified at the time of execution. On expiry of the futures contract, there is a convergence of price of a stock in cash & derivatives segment. Thus, gains are secured / assured irrespective of the market movements, only at the end of the month i.e. on expiry of the futures contract. If these trades are unwound prior to expiry, then they may / may not generate the pre-specified returns.</p> <p>The scheme shall also undertake Securities Lending and Borrowing within the framework as permitted by SEBI.</p> <p>However, if these trades fail to exist / if the returns generated are lower than that offered by liquid schemes / index, then the scheme may undertake a higher allocation to debt and money market securities.</p> <p>A portion of the corpus will also be invested in direct equities, IPO's, Options, open offer and buy-back. Allocation to these strategies will be restricted to the extent of 10% of the corpus size.</p> <p>Derivative Strategies: If and where Derivative strategies are used under the scheme the Fund Manager will employ a combination of the following strategies:</p> <p>Index Arbitrage: As the Nifty 50 derives its value from fifty underlying stocks, the underlying stocks can be used to create a synthetic index matching the Nifty Index levels. Also, theoretically, the fair value of a stock/ index futures is equal to the spot price plus the cost of carry i.e. the interest rate prevailing for an equivalent credit risk, in this case is the Clearing Corporation of the NSE.</p> <p>Theoretically, therefore, the pricing of Nifty Index futures should be equal to the pricing of the synthetic index created by futures on the underlying stocks. However, due to market imperfections, the index futures may not exactly correspond to the synthetic index futures. The Nifty Index futures normally trades at a discount to the synthetic Index due to large volumes of stock hedging being done using the Nifty Index futures giving rise to arbitrage opportunities.</p> <p>The fund manager shall aim to capture such arbitrage opportunities by taking long positions in the Nifty Index futures and short positions in the synthetic index. The strategy is attractive if this price differential (post all costs) is higher than the investor's cost-of-capital.</p> <p>Objective of the Strategy The objective of the strategy is to lock-in the arbitrage gains.</p> <p>Risks Associated with this Strategy</p> <ul style="list-style-type: none"> • Lack of opportunity available in the market. • The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. • Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place. <p>Cash Futures Arbitrage: The Plans under the scheme would look for market opportunities between the spot and the futures market. The cash futures arbitrage strategy can be employed when the price of the futures exceeds the price of the underlying stock.</p> <p>The Plans will first buy the stocks in cash market and then sell in the futures market to lock the spread known as arbitrage return. Buying the stock in cash market and selling the futures results into a hedge where the Plans have locked in a spread and is not affected by the price movement of cash market and futures market. The arbitrage position can be continued till expiry of the future contracts. The future contracts are settled based on the last half an hour's weighted average trade of the cash market.</p>
--	---

	<p>Thus, there is a convergence between the cash market and the futures market on expiry.</p> <p>This convergence helps the Plans under the Scheme to generate the arbitrage return locked in earlier. However, the position could even be closed earlier in case the price differential is realized before expiry or better opportunities are available in other stocks. The strategy is attractive if this price differential (post all costs) is higher than the investor's cost-of capital.</p> <p>Objective of the Strategy The objective of the strategy is to lock-in the arbitrage gains.</p> <p>Risk Associated with this Strategy</p> <ul style="list-style-type: none"> • Lack of opportunity available in the market. • The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. • Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place <p>Hedging and alpha strategy: The fund will use exchange-traded derivatives to hedge the equity portfolio. The hedging could be either partial or complete depending upon the fund managers' perception of the markets. The fund manager shall either use index futures and options or stock futures and options to hedge the stocks in the portfolio.</p> <p>The fund will seek to generate alpha by superior stock selection and removing market risks by selling appropriate index. For example, one can seek to generate positive alpha by buying an IT stock and selling CNX IT Index future or a bank stock and selling Bank Index futures or buying a stock and selling the Nifty Index.</p> <p>Objective of the Strategy The objective of the strategy is to generate alpha by superior stock selection and removing market risks by hedging with appropriate index.</p> <p>Risk Associated with this Strategy</p> <ul style="list-style-type: none"> • The stock selection under this strategy may under-perform the market and generate a negative alpha. • The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. • Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place <p>Covered Call Strategy: The fund manager shall use the covered call strategy by writing call options against an equivalent long position in the underlying security thereby locking in the returns instead of keeping the position open.</p> <p>This strategy allows fund managers to earn premium income in addition to returns locked in from the long underlying.</p> <p>Objective of the Strategy The objective of the strategy is to earn the option premium.</p> <p>Risk Associated with this Strategy</p> <ul style="list-style-type: none"> • The underlying security may fall by more than the option premium earned, thereby exposing the strategy to downside risks. • The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. • Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place. <p>Covered Put Strategy: If the Fund Manager has a bearish view on a stock /index, he may write put option on that stock/index with an equivalent short position in the futures of the underlying; thus earning the premium income.</p> <p>Objective of the Strategy The objective of the strategy is to earn the option premium.</p>

Aditya Birla Sun Life **Arbitrage Fund**

	<p>Risk Associated with this Strategy</p> <ul style="list-style-type: none"> • The underlying security may rise by more than the option premium earned, thereby exposing the strategy to downside risks. • The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. • Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place. <p>Other Derivative Strategies: As allowed under the SEBI guidelines on derivatives, the fund manager will employ various other stock and index derivative strategies by buying or selling stock/index futures and/or options.</p> <p>Objective of the Strategy The objective of the strategy is to earn low volatility consistent returns.</p> <p>Risk Associated with this Strategy</p> <ul style="list-style-type: none"> • The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. <p>Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place.</p> <p>Portfolio Turnover</p> <p>The scheme has no explicit constraints either to maintain or limit the portfolio turnover. Portfolio turnover will depend upon the circumstances prevalent at any time and would also depend on the extent of volatility in the market and inflows/outflows in the scheme. The Fund Manager will however endeavour to maintain a low portfolio turnover rate.</p> <p>A higher churning of the portfolio could attract high transactions of the nature of brokerage, custody charges etc.</p>
<p>Risk Profile of the Scheme</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Memorandum (SIM) carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <ul style="list-style-type: none"> • The scheme will aim to generate absolute returns over and above money market returns/liquid funds. The performance of the scheme will depend on the ability of the fund manager to identify opportunities prevailing in terms of price spread (difference) in the cash and derivative market. No assurance can be given that Fund Manager will be able to locate investment opportunities or to correctly exploit price spread in the equity markets. There may be instances where the price spread between cash and derivative market is insufficient to meet the cost of carry. In such situations, the Fund Manager due to lack of opportunities in the derivative market may not be able to outperform liquid/money market funds. In addition to this, there can be increase in number of transactions as the fund manager has to take simultaneous calls in cash and derivative market, which may lead to high portfolio turnover and consequently will lead to high transaction costs. • There can be no assurance or guarantee that the arbitrage opportunities may exist at all times in the capital market. The lack of arbitrage opportunities shall not provide an opportunity to the Fund Manager to exploit price discrepancies in the capital markets. • Though the constituent stocks of most indexes are typically liquid, liquidity differs across stocks. Due to the heterogeneity in liquidity in the capital market segment, trades on this segment do not get implemented instantly. This often makes arbitrage expensive, risky and difficult to implement. <p>The Fund intends to take advantage of opportunities arising out of corporate events like open offers, buy-back, merger, initial public offers, etc. The lack of such corporate events may lead to lack of opportunities to the Fund Manager.</p>

a. **Investment in Direct Plan:** Investors applying under Direct Plan, are advised to write the word 'DIRECT' in the column 'ARN No' or 'Broker Code' in their applications for purchases/additional purchases/swiches in all such cases where applications are not routed through any distributor/ agent/ broker. In cases where unit holder uses a pre-printed transaction slip/application form where details in the 'ARN No' or 'Broker Code' column is already printed, unit holder should cancel the ARN No/ Broker Code, write 'DIRECT' in the said column. **Also, in case ARN No/ Broker Code is mentioned in the application form, but "Direct Plan" is indicated, the ARN No/ Broker Code will be ignored and the application will be processed under Direct Plan, subject to it being complete in all other aspects. Further, where application is received for Regular Plan without Distributor code or "Direct" mentioned in the ARN Column, the application will be processed under Direct Plan.**

b. Employee Unique Identification Number (EUIN) is a unique number allotted to Sales personnel i.e. employee/ relationship manager/ sales person of the distributor interacting with the investor for the sale of mutual fund products. Such sales personnel associated with Distributor, should also be holding a valid NISM certificate. **Thus, in case of applications routed through distributors, in addition to the AMFI Registration Number (ARN) of the distributor, investors are requested to also provide the EUIN of the individual ARN holder or of employee/relationship manager/sale**

person of the Distributor interacting with the investor. Providing appropriate EUIN in the application/transaction forms would assist in tackling the problem of mis-selling even if the Sales personnel on whose advice the transaction was executed by investor leaves the employment of the distributor or his/her sub broker. If the distributor has not given any advice pertaining to the investment (i.e. transaction is 'execution only'), then the EUIN box may be left blank, but it would be mandatory for the investor to provide confirmation as mentioned in the application form.
