In line with para 12.24 of SEBI Master Circular on Mutual Funds dated May 19, 2023, the cumulative gross exposure to equity, equity related instruments including ETFs, debt, money market instruments, units issued by REITs & InvITs, derivatives, repo transactions and such other securities/assets as may be permitted by the Board from time to time subject to regulatory approvals, if any should not exceed 100% of the net assets of the Scheme.

The investment by the Scheme in overseas securities and overseas ETFs is subject to compliance with the industry-wide limit as stipulated by RBI/SEBI from time to time. The Scheme may not be able to make investment in overseas securities and overseas ETFs in case of breach of such industry-wide overseas limits. In such a situation, the performance of the Scheme could be affected.

Investment by the Scheme in debt instruments, having credit enhancements backed by equity shares directly or indirectly, shall have a minimum cover of 4 times considering the market value of such shares. Further, the investment in debt instruments having credit enhancements should be sufficiently covered to address the market volatility and reduce the inefficiencies of invoking of the pledge or cover, whenever required, without impacting the interest of the investors. In case of fall in the value of the cover below the specified limit, AMCs will initiate necessary steps to ensure protection of the interest of the investors.

Portfolio Rebalancing

Rebalancing due to Short Term Defensive Consideration

Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations as per para 1.14.1.2 of SEBI Master Circular on Mutual Funds dated May 19, 2023, and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.

Rebalancing due to Passive Breach:

Further, as per para 2.9 of SEBI Master Circular on Mutual Funds dated May 19, 2023, as may be amended from time to time, in the event of deviation from mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of the Scheme within 30 Business Days. In case the portfolio of the Scheme is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in para 2.9 of SEBI Master Circular on Mutual Funds dated May 19, 2023.

Investment Strategy

The Scheme follows an active investment strategy. The investment objective of the fund is to generate long-term capital appreciation by investing in equity and equity related instruments selected based on an in-house proprietary quantitative model.

The investment process will be based on a factor-based approach with the aim of generating superior risk adjusted returns compared to the benchmark. The factors employed are the ones that have a strong academic basis and / or are considered central by fundamental investors in their process. The investment universe would be screened using quantitative measures like data availability, liquidity etc. and then subsequently factors described below would be used to evaluate the stocks' attractiveness from a risk and return perspective. The parameters that the model will consider are as follows:

Fundamental Factors:

The model will look at various factors to evaluate growth outlook while considering valuation parameters for these companies. For this, the indicative list of aspects that the model may consider are as follows:

- · Return on Equity
- · Return on Assets
- Sales growth
- Debt to equity ratio
- Cash flow
- Operating Profit Margins
- · Net Profit Margins
- Earnings growth
- Price to book
- Price to earnings
- · Dividend yield
- Earnings yield

Technical/Behavioural Factors:

The model will look to capture the behavioural attributes reflecting in the stock price movement. For this, the indicative list of aspects that the model may consider are as follows:

- Liquidity
- Stock price momentum
- Volatility
- Historical performance
- Ownership patterns
- Drawdown analysis and other such parameters

Risk factor:

While looking for the attractiveness of a stock, the model will also analyse the risk levels of the stocks. While some risks can be measured, some cannot. Fund managers may look at quantitative factors to gauge the risk level of a stock. For this, the indicative list of aspects that model may consider are as follows:

- Volatility
- Beta
- Risk ratios
- Liquidity and
- Portfolio churn

The fund will look at Factor investing strategies that would target securities with specific characteristics such as value, quality, momentum, size, minimum volatility etc.

Not owning 'poorly run companies' is a significant source of alpha generation over the long term. The investable universe list of stock is pruned by applying objective predefined criteria that excludes companies that are either very illiquid or score poorly on governance standards excessive leverage or past drawdown behaviour or capital allocation or return metrics or on operating parameters consistently etc.

The Fund Manager can change the above quantitative and qualitative parameters by addition or deletion of the parameters, to enable the Scheme to take exposure to the specified factors for selection of stocks. The process from universe selection to portfolio

construction would be largely systematic and optimized with the aim of maximizing the return while minimizing active risk. The portfolio of the Scheme will be reviewed constantly and rebalanced on least monthly basis based on the output of the model. The fund manager will also review and maintain the model (including variables) on an ongoing basis and make changes as and when necessary. The Scheme may also invest in equity and equity related instruments which are not a part of in house proprietary quantitative model.

Debt & Money Market Instruments

The Scheme may also invest a small portion of its corpus in money market instruments to manage its liquidity requirements. The fund investment in debt securities and money market instruments issued by corporate and/or state and central government with the aim to controlling volatility and providing cash flows on a continuous basis. Rigorous indepth credit evaluation of the securities proposed to be invested in will be carried out by the investment team of the AMC for its fixed income investments. In addition, the Investment Team of the AMC studies the macro-economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. Investments in debentures and bonds will usually be in instruments which have been assigned investment grade ratings by any approved rating agency.

REITs & InvITs

Investment in REITs or InvITs will be made based on the various factors such as liquidity, sector outlook and returns expectations. The investment across asset class within the stated range will be based on opportunities available in the different asset classes and future outlook for the Markets.

Derivatives

The Scheme may have prudent exposure to Futures & Options (F&O) to capture opportunities arising out of market imperfection and to hedge the portfolio, whenever necessary. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

For detailed derivative strategies, please refer to SAI.

ABSLAMC may, from time to time, review and modify the Scheme's investment strategy if such changes are considered to be in the best interests of the unit holders and if market conditions warrant it.

Portfolio Turnover

The Scheme has no explicit constraints either to maintain or limit the portfolio turnover. Portfolio turnover will depend upon the circumstances prevalent at any time and would also depend on the extent of volatility in the market and inflows/outflows in the scheme.

A higher churning of the portfolio could attract high transactions of the nature of brokerage, custody charges etc.

Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Memorandum (SID) carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Investments in the Scheme are subject to various risk factors including but not limited to risks associated with: Thematic Fund, investment in Equity and Equity related instruments, investments in Fixed Income Securities such as Price-Risk or Interest-Rate Risk, Credit Risk, Liquidity or Marketability Risk, Reinvestment Risk, Pre-payment Risk, etc., investments in Derivatives (The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments), investments in Overseas Securities including Overseas ETFs, investments in Repo Transactions in Corporate Bond, investments in Securitised Debt assets which would be in the nature of Mortgage

Backed Securities (MBS) and Asset Backed Securities (ABS) with underlying pool of assets and receivables like Housing Loans, Auto loans and corporate loans. The various risks associated with securitised assets include Prepayment Risk, Credit Risk, Liquidity Risk, Conversion risk, Price risks etc., risks associated with investment in units of REITs and InvITs, Risks associated with creation of segregated portfolios and risks associated with Writing of Covered Call Options, Securities Lending and Borrowing, Structured Obligations/Credit Enhancements. Risk factors associated with instruments having special features & Risk associated with imperfect hedging. The Scheme will not invest in Credit Default Swaps, commodity derivatives and short selling. Different types of securities in which the Scheme would invest as given in the Scheme Information Document/Key Information Memorandum carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. The above are some of the common risks associated with investments in various securities. There can be no assurance that the Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis. Further, the Fund/AMC is not guaranteeing or assuring any returns. Further, it should be noted that the actual distribution of Income Distribution cum capital withdrawal ("IDCW") and the frequency thereof are indicative and will depend, inter-alia, on availability of distributable surplus, IDCW payouts will be entirely at the discretion of the Trustee.

Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, i.e. before making a decision to invest/redeem Units.

Investors in the Scheme are not being offered any guaranteed returns. Please refer to SID for detailed scheme specific risk factors.
