Such exposure to equity derivatives of constituents of the underlying Index would be taken for short duration when securities of the Index are unavailable, insufficient or for rebalancing at the time of change in Index or in case of corporate actions or for hedging purposes, as permitted by SEBI/RBI.

In line with para 12.24 of SEBI Master Circular on Mutual Funds dated June 27, 2024, the cumulative gross exposure to equity, equity related securities, debt, money market instruments, derivatives, and such other securities/assets as may be permitted by the Board from time to time subject to regulatory approvals, if any should not exceed 100% of the net assets of the Scheme.

Money Market Instruments include commercial papers, commercial bills, treasury bills, Government securities having an unexpired maturity upto one year, call or notice money, certificate of deposit, usance bills, Tri-party Repo on Government securities or treasury bills (TREPS) and any other like instruments as specified by the Reserve Bank of India from time to time.

# Portfolio Rebalancing

# Rebalancing due to short term defensive consideration:

Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, and political and economic factors. Such changes in the investment pattern will be for short term and defensive considerations as per para 1.14.1.2 of SEBI Master Circular on Mutual Funds dated June 27, 2024. However, due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short-term purpose only not exceeding 7 calendar days, for defensive considerations and the intention being at all times to protect the interests of the Unit Holders.

# Rebalancing due to passive breach

Pursuant to provisions of 3.6.7 of SEBI Master Circular on Mutual Funds dated June
27, 2024 rebalancing the portfolio of the Scheme shall be as follows:
- In case of change in constituents of the index due to periodic review including
corporate actions, the portfolio will be rebalanced within 7 calendar days.

- Any transactions undertaken in the scheme portfolio in order to meet the redemption and subscription obligations will be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

# **Investment Strategy**

The Scheme will follow passive investment strategy and will invest not less than 95% of its corpus in stocks comprising the underlying index and endeavour to track the benchmark index while minimizing the tracking error. The investment strategy would revolve around reducing the tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the index as well as the incremental collections / redemptions in the scheme. The AMC does not make any judgments about the investment merit of Nifty India Defence Total Return Index nor will it attempt to apply any economic, financial or market analysis. The Scheme may also invest in cash/cash equivalent and debt/ money market instruments including units of Liquid schemes, in compliance with Regulations to meet liquidity and expense requirements.

## **Derivatives**

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

For detailed derivative strategies, please refer to SAI.

ABSLAMC may, from time to time, review and modify the Scheme's investment strategy if such changes are considered to be in the best interests of the unit holders and if market conditions warrant it.

# Portfolio Turnover

As the Scheme will follow a passive investment strategy the endeavor will be to minimize portfolio turnover subject to the exigencies and needs of the scheme. Generally, as the scheme is open-ended, turnover will be confined to rebalancing of portfolio on account of new subscriptions, redemptions and change in the composition of the Nifty India Defence Total Return Index. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

A higher churning of the portfolio could attract high transactions of the nature of brokerage, custody charges etc.

# Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Memorandum (SID) carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Investments in the Scheme are subject to various risk factors including but not limited to risks associated with: liquidity risk, regulatory risk, lack of active market, tracking error, redemption risk, investments in Fixed Income Securities such as Price-Risk or Interest-Rate Risk, Credit Risk, Liquidity or Marketability Risk, Reinvestment Risk, Prepayment Risk etc. and risk associated with Creation Of Segregated Portfolio. Different types of securities in which the Scheme would invest as given in the Scheme Information Document/Key Information Memorandum carry different levels and types of risk.
