Indian equity markets closed higher for the fourth consecutive session amid positive global cues. The key benchmark indices extended its gains and reached fresh high driven by expectations of an easing interest rate cycle by the U.S. Federal Reserve and RBI in the medium term due to moderate inflation.

However, the company's revenue from operations saw a decline of 21% compared to the previous year. The company's revenue from operations stood at Rs 739 crore for the first quarter of FY25.

Ambuja Cements, a subsidiary of the Adani Group, announced a decline in its standalone profit for Q1FY25, which decreased by 11.5% YoY to Rs 571 crore, compared to Rs 645 crore in the same quarter of the previous fiscal year. #### Term of the Day

#### Fungibility

Definition: Fungibility refers to the quality of being able to substitute or interchange one unit of a financial instrument for another unit of the same financial instrument. However, in trading, a financial instrument is said to be fungible if buy or sell of the same financial instrument can happen on a different market with the same end result.

## Explanation

There are many financial instruments which qualify to be considered as fungible. Some of those financial instruments include individual stock, gold, silver, currencies etc. These fungible financial instruments are generally used in arbitrage trades as price difference often arises due to difference in location.
